Abstract

This project aims to develop the barber device management system and the online sewing equipment: a Case Study Rungroj Shop, as well as evaluate the satisfaction of users.

The system was developed in accordance with System Development Life Cycle by using Visual Studio and MySQL as a database management program. The quality and satisfaction were assessed by using questionnaires from 3 experts and 10 users.

According to the analysis the quality and satisfaction assessment, the result showed that the experts and users were satisfied at a high level. In conclusion, the system can be used.
