ABSTRACT

This project aims to develop a cosmetic production support system, a case study of Nada classic of beauty. The system consists of license assignment, employee management, business partner management, product type management, product management, inventory management, agent management, ordering, production, delivery, returning, printing out report, and usage information management. The development of a cosmetic production support system, a case study of Nada classic of beauty, is developed by using the PHP (PHP Hypertext Preprocessor) programming language and MySQL as a database.

According to the analysis of the satisfaction of cosmetic production support system, a case study of Nada classic of beauty, found that the efficacy is rated at high level (Average = 4.16, Standard Deviation = 0.54) and the satisfaction is rated at high level also (Average = 4.68, Standard Deviation = 0.49) the developed system can be used efficiently.
